

FRANKLIN SHEET METAL

CAGE: 8S6TO

METAL DESIGN AND FABRICATION

WE GUARANTEE YOUR COMPLETE SATISFACTION.

A History of Excellence

With more than six-and-a-half decades of experience designing and fabricating precision metal products, Franklin Sheet Metal is one of the oldest and most dependable metal fabricators in New England. We could not have achieved and maintained our level of success without consistently delivering the finest precision sheet metal products on time at competitive prices.

Our decades of focused work in the highly specialized field of designing and fabricating precision metal products have provided us with the proven skills to manufacture a wide variety of high-quality metal components for use in critical applications in medical, telecommunications, military, aerospace, electronics, transportation, computing, robotics, and manufacturing industries, to name a few.

As these industries have grown and evolved, so has Franklin Sheet Metal. And now we've partnered with MacDiarmid Machine to expand our

capabilities even more, providing our customers with greater options and a full range of precision machining abilities, while facilitating seamless project management from prototype to full production and assembly.

Our skilled engineers, welders, fabricators, technicians, and support staff are ready to help you with your design needs and answer your questions. We strive to provide a gratifying and productive collaboration resulting in the best product you can buy.

Quality reflecting the finest American craftsmanship. Dependable precision and on-time delivery. Fair and competitive pricing. Friendly and accessible customer service provided by people who understand your specialized needs. Design assistance from experienced engineers. When you need sheet metal products to match your exact specifications with a short lead time, Franklin Sheet Metal is the clear choice.
